## **POSITION STATEMENT**

### **HOMEOPATHY & VACCINATION AGAINST COVID-19**

Monday, December 14, 2020 – In the context of the Covid-19 vaccination campaign conducted by public health authorities, Boiron Canada would like to clarify the following elements:

- Boiron Laboratories recognize the importance of vaccination in the fight against Covid-19 from a public health perspective;
- There is no "homeopathic vaccine" against Covid-19 or any other infectious disease, as no homeopathic medicine can generate the production of specific antibodies;
- No Boiron homeopathic medicine is specifically indicated for the prevention or treatment of Covid-19.

For more information on vaccination against Covid-19, contact your local public health authority and visit:
